Address: 1654 ASPEN CT, APT#137
Kent, OH-44240.

WORK EXPERIENCE

June 2016

NEARME APP.

Kent, OH

Developed an application using Angular JS, where I have built a location-based service using a third-party custom directive in which I will fetch the data from Wikipedia API and display it to the map. I have mapped URL's to different views using routing. Technologies: Angular JS, Bootstrap, HTML, CSS.

May 2016

SNAP BOOK.

Kent, OH

It is a snapbook consists of images and given a like or unlike option developed in Angular JS framework where the images are showed up in the view, controller is used to store an array containing the objects and directives are used to simplify the code. Technologies: HTML, CSS, JavaScript, Angular JS, Bootstrap.

May 2016

ARTIST DIRECTORY.

Kent, OH

Developed a web page, which retrieves the data of an artist, which is designed in an alphabetical order through a drop-down menu, and with a backend database to save the content of the same.

Technologies Used: HTML, CSS, JavaScript, Angular JS.

August 2015 / December 2015

SHOPPING CART at Kent State University.

Kent, OH

Built an e-commerce website that resembles websites like Amazon, E Bay. Collected the requirements, setup the tools, designed wire frames, created web pages, laying down ER Diagrams, implemented a database, populating or retrieving data from post and get services respectively.

Technologies Used: HTML5, CSS3, JavaScript, JQuery, JSON, T-SQL.

January 2015 / May 2015

**DATABASE SETUP FOR ONLINE COURSE
REGISTRATION** at Kent State University.

Kent, OH

The main goal of this project is to design a database for online course registration which includes the Implementation functionalities pertaining to a database administrator which involved creating schema, ER Diagrams, tables. Implemented the features using PL/SQL procedures and functions.

Technologies Used: Oracle 10g, Oracle SQL Developer.
